

RIGGING FUNDAMENTALS

Presented by Construction & Maintenance Education Foundation

TUESDAY, January 19

6:00pm to 10:00pm

CMEF Office

**2950 East X Street
La Porte TX 77571**

**COIPA Members: \$50.00
Non-COIPA members: \$75.00**

This class is a thorough overview of the basic rigging principles and will prepare one for the NCCER Rigging Fundamentals written Assessment. However, this class is NOT submitted to the NCCER and therefore will not be reflected in the NCCER National Registry.

The OBJECTIVES of the class are:

- 1. Identify three types of slings (wire, synthetics, and chain)**
- 2. Understand inspection and rejection criteria (slings and hardware)**
- 3. Understand basic hitches and proper connections**
- 4. Understand how to read capacity charts for slings and hardware**
- 5. Recognize ANSI hand signals**
